

# Your family's name, *set in the walk* for good.

A family name, a house number, a line that means something — pressed into a driveway, patio, or garden path while the concrete is still fresh. It becomes part of the slab, so there's nothing to peel, fade, or repaint.

## HOW TO GET ONE

01

### Design it free

Type your words in the online designer and see the exact 3D impression, at your exact size, with the price as you go.

02

### We cut and ship it

Your stamp is carved and on its way in at least 10 business days — a rigid plastic plate with your words in its face.

03

### Your contractor presses it

It takes about a minute during the pour. Quick steps come in the box and the crew guide is emailed with your order, so any concrete crew can do it.

## WHAT IT COSTS

**\$100–\$350**

Where most stamps land · priced by size, shipping calculated at checkout

## HOW LONG IT TAKES

**at least 10 business days**

From order to dispatch, then standard shipping across the US and Canada

## HOW LONG IT LASTS

**As long as the slab**

20 years of field record — the words are the concrete itself

**See your words in concrete — free.**

The designer is free and needs no account to try. Type a name, pick a size, and watch it press in 3D before you decide anything.
